

PERAWATAN TERHADAP PERANGKAT JARINGAN

Dalam pengelolaan jaringan perlu adanya perawatan perangkat jaringan agar perangkat tidak mudah rusak. Salah satunya dengan melakukan penjadwalan rutin untuk *restart* perangkat maupun *update software/firmware*/sistem operasi *router*, *accesspoint*, maupun *switch*. Untuk restart device dilakukan 3 hari sekali dan untuk *update firmware*/sistem operasi dilakukan jika ada informasi pembaruan.

| Name | Start Date | Start Time | Interval | Owner | Run Count | Next Run | On Event |
|-----------------|-------------|------------|-------------|-------|-----------|----------------|-------------------|
| Auto Backup ... | Dec/26/2022 | 00:00:00 | 1d 00:00:00 | admin | 2 | Mar/14/2024 | /system script... |
| Auto restart | Jan/01/2023 | 00:05:00 | 3d 00:00:00 | admin | 0 | Mar/14/2024... | /system reboot |

| Operator | Description | Target Version | Process | Time Range | Created At | Result (Success/Failure/Aborted) | Action |
|--------------------------|------------------------------|-----------------------------------|---------|-------------|---------------------|----------------------------------|--------|
